

## “Compact” series luminaires C110,C110R,C110DIM

Luminaires of these series are designed to be used in field shootings and in rooms which are not designed for the studios where the compactness and low weight are the key requirements as well as high parameters of light flow.

These requirements were successfully implemented in the luminaires **C110**, **C110R** and **C110DIM** of “Compact” series.

### Key advantages:

- \* Low weight < 2 kg (with lamps included) allows the use of lighter stands or brackets which can be fixed on any plane (e.g. furniture, shelves, etc.).
- \* Compact luminaires are convenient for transportation.
- \* An even illumination can be obtained at all directions.
- \* It is simple to change luminaire's position and this ensures quality work which can be done in any space or position.
- \* Low energy demand (< 120W).

### Luminaire C110

Weight: - 1.9kg (with lamps included)  
 Mounting: - 16mm socket.  
 Electric wire: - 3,5 m length with “Schuko” connector.  
 Power supply: - 220V 50Hz 120W  
 Lamps: - OSRAM STUDIOLINE 55W/ 3200  
           OSRAM STUDIOLINE 55W/ 5600  
 Two pieces included.  
 A reflector material VEGA95 is used in the luminaire.

**C110R** is a version of luminaire **C110** with a barndoor covered with light reflecting material.

**C110DIM** is a dimmed version of luminaire **C110**. The light flow is adjusted by a potentiometer located on the frame. The adjustment range varies from 10 to 100%. The light flow adjustment helps solving illumination tasks with expedition when there is no possibility to get the light source closer or further away.

## NEW Lighting Kit

Dimensions: 590x480x140mm  
 Weight of the set: 12kg  
 Composition of the set:

1. Luminaires C110 (C110R, C110DIM) – 3 pcs.
2. Auxiliary lamps - 6 pcs.
3. Ship case – 1pcs.

Other alternatives of the set and dimensions of the ship case are available.
